

Prediction of virus-human PPIs

Model construction and evaluation (x100 times)

Phenotype prediction

Predict human infectivity (HI)

Predict virulence (VL)

1. high level
2. low level

Predict viral transmission route (TRO)

1. direct contact
2. fecal oral
3. respiratory
4. vector

Predict human transmissibility (HT)

1. no human-to-human
2. limited human-to-human
3. sustained human-to-human

Predict viral tissue tropism (TT)

1. gastrointestinal
2. neural
3. respiratory
4. systemic
5. viraemic
6. other
